

Center for Learning Connections presents....

Working with Individuals with Non-apparent Disabilities

Tuesday, February 9, 2010 | 8:30 am - 4:30 pm

Green River Community College | Kent Campus | 417 Ramsay Way | Kent, WA 98032

Who should attend this workshop? Counselors, case managers, educators, corrections staff, and anyone else in the business of helping people commit to changing their lives.

Are you providing assistance or support to clients entering workplace environments? Perhaps you are helping someone transition from an adult basic education class to postsecondary training... Maybe you are teaching a learner who is working on the GED. Whatever the scenario, the chance that you are working with an individual with a non-apparent disability is highly likely.

This one-day workshop will provide you with tools, materials, and strategies to work with individuals who have learning disabilities, attention disorders, emotional and mental health conditions, and other cognitive non-apparent disabilities. Join Nancie Payne for relevant, hands-on approaches when delivering services that support individuals and foster success.

Objectives:

- Understand the relevance of non-apparent disabilities in the delivery of workforce training, employment placement, adult education, and postsecondary education services
- Recognize the early characteristics and behaviors that pose as barriers to successful outcomes
- Learn to apply a strength-based cognitive mapping approach in the provision of services
- Employ a universal access to learning and working model for all clients

TRAINER - NANCIE PAYNE, President/CEO of Payne & Associates, Inc
