Recognizing “*Substance Abuse*” early and referring the client to appropriate professional/community resources can make a huge difference. This can often be the key to success for many of our clients.

This full day interactive training will provide you with the knowledge and skills to effectively recognize, understand, and assess for “*Substance Abuse*” and consequently equip you with the information to successfully connect the client with appropriate community/professional resources.

### Participants will:

- understand the rules that govern treatment services
- learn how to identify the signs and symptoms of abuse/addiction
- understand the complexity of drug and alcohol addiction
- understand how drugs and alcohol influence families
- learn how to identify potential harm and what steps to take
- be introduced to the language of treatment planning and understand how information between organizations will result in a better outcome for the client
- be able to determine the way in which a client’s readiness for change influences the outcome of treatment and the appropriate level of care
- learn how to locate the appropriate resources in their community for referrals
